A jungle giant made perfect for every home

One of the most iconic and recognisable house plants, the Monstera Deliciosa has been a favourite for decades now. **Very easy to grow** the monstera is the **perfect variety for beginners** who want a big impact plant for their collection. Originally from the tropical forests of Mexico these plants can grow over 60 feet tall in the wild. Indoors they are a little more tame, but their **fast growth and large leaves** make them a favourite for many. The characteristic leaves will slowly unfurl and darken to a **beautiful deep green** and the older the plant the more perforations will appear on the leaves; a trait which earnt it the name of 'Swiss Cheese Plant'. Monstera's **can be displayed in a number of ways**, either trained to climb up, usually with the assistance of a moss pole, or left to spread out wild and care free. NASA has also rated the monstera as **one of the best air purifying houseplants**.

Variety Information

Estimated Plant Height	80-110cm
Pot Dimensions	H24cm / W30cm
Preferred Location	Bright indirect light - avoid direct sunlight
Temperature Range	15-25C
Watering Requirements	Water once a week and mist when temperatures rise

Features

- Nursery Fresh
- Low Maintenance
- Air Purifying
- Easy to Grow

Planting Tip

A great plant for living areas – train them up a moss pole for a dramatic addition to any room.

How Your Plant Will Arrive | Care Guide | Plant Theory | Planting Essentials

Our house plants are all grown in optimum conditions to ensure healthy, happy plants. Your plant will be sent directly from our specialist tropical nursery based in England.

Packaging

Plant Theory has sustainability at its heart. That means that every house plant will be delivered in **eco-friendly packaging that doesn't compromise on protection**.

The intuitive box design is **totally plastic free** and optimised to keep your plants safe in transit, without unnecessary harm to the environment. The cardboard packaging is **fully recyclable** to deliver you a more eco-conscious product.
