For the warmth of a traditional firepit with an added **flair of artistry and craftsmanship**, a fire globe is a perfect thing. This **steel globe** makes for a beautiful centrepiece with the **leaf pattern design casting beautiful lights and shadows** over its surroundings. This makes for a great spot for everyone to gather together, extending the time spent outside in the garden with the **360° warmth of the fire**. The globe is **crafted from a heavy gauge oxidised steel** and the **intricate design is laser cut**. The oxidised material makes for a **beautiful weathered finish** which sits nicely with the natural designs cut into the material. The whole globe sits on a heavy **cast iron stand**.

Features:

- **Extend your summer evenings** - the warmth of the firepit can keep everyone content to spend more time out in the garden, especially when the evenings draw in
- **Laser cut pattern** - the repeated leaf design makes for a wonderful display against the light of the fire
- **Oxidised finish** - creates a beautiful rustic finish that can sit comfortably in any garden design
- **360° degree view** - globe ensures for wonderful views of the flames through the pattern whilst keeping everyone warm

Specifications:

- **Height:** 61cm (24in)
- **Diameter:** 50cm (20in)
- **Weight:** 7kg
